

SMS FEATURE SPECIFICATIONS

OVERVIEW

The Unicast SMS feature empowers advertisers to extend their message and brand to the highly coveted mobile audience. User's can now send an SMS text message to a mobile device directly from an online ad unit. The SMS offering may include an embedded text link which can launch a Unicast powered Mobile Mini-Site.

Unicast's Mobile Mini-Site offering is configured dynamically based upon the detected capabilities of the mobile device. For example, if a video is included in the Mini-Site, the device's capabilities to display a streaming or progressive video in several different formats will be detected and the appropriate experience will be seamlessly delivered.

GENERAL SUBMISSION GUIDELINES:
